

PMD (UK) BREXIT NOTICE

PMD have been and continue to consider the effects of Brexit on all areas of our business.

Our considerations have concentrated on three main areas:

- (i) Effects to our supply chain
- (ii) Implications to our customers
- (iii) Uncontrollable effects to our industry and business.

These areas were then given an order of priority to address with supply chain and implications to our customers being our initial primary concentration.

PMD have focused on our raw material sourcing. We have been successful in ensuring that 87% of our raw materials purchased originate from either UK sources or sources outside of the EU. Of the remaining 13% we have 8% that are approved suppliers that, although the manufacturing plants are in EU, each company has a UK subsidiary.

Import duties and border delays: this as an area of business out of our control, to reduce the impact of this our focus has been on UK manufactured sourcing.

In the event of a “No deal” we have evaluated that there could possibly be a need to increase staff in our export sales area.

Customers will be kept informed of issues affecting products and services through our existing procedures.
