

## **REACH STATEMENT**

PMD and its customers are classed as “Downstream users” under the REACH Regulations.

### **PMD's responsibilities are:**

1. To inform our suppliers of the applications and method of use (exposure scenarios) of our products.
2. To inform our customers in a timely manner about the continuity of supply.
3. To provide updated MSDS to our customers including exposure scenarios as this data becomes available following registration of the substances.

We have contacted our suppliers to confirm pre-registration of the substances required and will continue to liaise with them during the registration process.

As Downstream users our customers do not have a responsibility for registration. Your responsibility is to communicate your application of our products along the supply chain. We are then able to ensure that all uses of products are passed on up the chain. PMD may contact you to discuss your application and the descriptions to be employed.

Further information on REACH can be obtained at: [http://echa.europa.eu/reach\\_en.asp](http://echa.europa.eu/reach_en.asp)

Enquiries concerning REACH at PMD should be directed to:

Stephen Lord - Technical Manager.
